

# TAKE CONTROL

WEB BASED COLLECTIONS THAT PUT YOU IN CHARGE

- Branded web based collections
- Call centre application
- Copy invoice tools
- Statement tools
- Query tools
- Field agent cash handling
- Homeworker tools
- Live reporting

Open Payment System has established itself as a major player in the online payment marketplace.

Over the past two years we have built a formidable list of clients who use us to improve their cash flow and reduce debtor days whilst making it easy for their customers to simply pay their bills.

### Take payments online

Let your customers make payments to you through the Internet.

In the age of e-commerce your customers demand the convenience of being able to settle their bills using a credit or debit card 24 hours a day 365 days a year.

### Secure collections

State-of-the-art encryption to make payments to you safe and secure.

We understand e-commerce and online payments better than most. That's why we use the latest SSL 256-bit encryption technology for payments made through our systems.

### First class payment services

Our payment service provider gives first class service and reliability.

As one of the top providers for payment services in the UK, Datacash currently process 11 million transactions per month.

### Real time reporting

Real time reporting ensures you can get a live picture of collections 24/7.

Our open payment system gives you access to unlimited real-time reports that let you get a handle on collections performance with a click of the mouse.

### Global coverage

Take payments in any currency using our multi-currency tools.

Built into our system is the ability for you to accept payments in most currencies of the world. Settled directly into your bank account.

### Reduce transaction costs

All your customer payment transactions can be in one place.

Customers, debtors and internal staff will all process payments through the same system using credit/debit cards, cheques or cash.

### Copy invoices

Give your customers access to copy invoices and statements with ease.

Our system allows for PDF copies of invoices and statements, thereby removing unnecessary admin delays from your collection process.

### Improve cash flow

Reduce debtor days by enabling simple and efficient payments online.

Our system will even allow for 'micro-payments' of invoices over an agreed time frame ensuring positive and continued flow of incoming funds.

### Enforce your brand

The Open Payment System look and feel is fully customisable.

Quickly and easily match the Open Payment System pages to your corporate branding. Including a single screen for payment facility and data collection at the click of a button.

### Granular accessibility

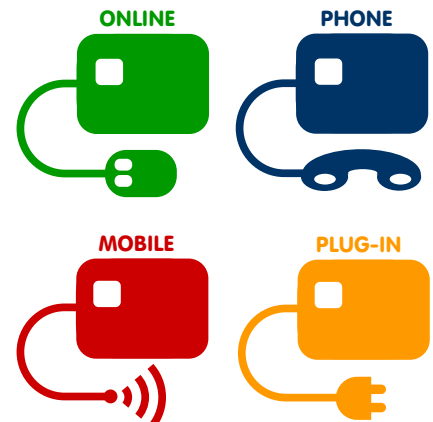

Our Open Payment System can be 'micro-tailored' to suit your organisation.

Secure access internally can be made available to the most senior level users through to every-day process operators with multi-level user restrictions where appropriate.
